### Liaison statement to Video Quality Experts Group (VQEG)

QUALINET thanks VQEG for the updates on the progress of its work. QUALINET notes with interest the newly started projects by VQEG on 3D Gaming Video Quality and on Adaptive Video Streaming. QUALINET would be happy to collaborate on these topics since there are already activities going on which cover these topics in the Gaming Task Force and in the 2D/3D 2D/3D video and streaming Task Force. Other activities that QUALINET especially would like to highlight are the effort to implement a QoE Journal and the work on objective metrics validation. Both of which the outcomes QUALINET believes would be beneficial for VQEG as well. For a complete and current list of activities see [www.qualinet.eu/index.php/qualinet-task-forces](http://www.qualinet.eu/index.php/qualinet-task-forces)

QUALINET is happy to hear that the joint email reflector has been implemented. Apart from establishing a discussion forum for common topics of interest, QUALINET suggests a cross posting of general information of common interest such as e.g. newsletters, status reports, call for papers etc.
