The Video Quality Experts Group (VQEG) thanks EU COST action QUALINET for the support from the organizations willing to provide inputs to the VQEG's efforts. VQEG recognizes that since many people are active in both organizations a productive exchange is already taking place.

VQEG would also like to inform QUALINET that the Hybrid Perceptual/Bitstream project is moving into its final phase and it is expected that the final report will soon be finished and submitted to the relevant study groups within the ITU and made available to QUALINET.

VQEG is also happy to announce the first issue of the VQEG eLetter is now online ([VQEG eLetter webpage](#)).

VQEG, is also gladly noting the ad-hoc cooperation between QUALINET and VQEG within the area of adaptive streaming and validation.

VQEG would also encourage QUALINET members to participate in the upcoming VQEG meeting Stockholm, July 7-11, 2014 as it is in Europe.
