

RICE

Sebastian Arndt, Ulrich
Engelke, Kjell Brunnström,
Yasuhiro Inazumi, Eva Cheng

DISCUSSION POINTS

- Source video (how can we get them? 5 min hopefully open source. 5 or more)
- Resolution (may depend on what we can get as source?)
- Coding (codecs?. Can anyone help encode the video for us?)
- Subjective method (ACR?)
- Number of test subjects (24 traditional, maybe more is needed to find differences between labs?)
- Relevant ITU rec (ITU-T Rec. P.913? for subjective method, Standards for EEG testing?)
- Viewing condition (Lab, living room, public...? Cross lab maybe a mix?)
- Inventory of Labs with equipment (did last time but reiterate)
- Inventory of Labs with interest to participate (did last time but reiterate)
- Ethical approval?
- ??
