UHD content contribution to VQEG for research purposes

Content will be available on CDVL

Sports content

- The Sony F55 camera was used to record the sports content.
- The UHD SDR used the S log 2 profile for the dynamic range.
- The UHD HDR used the S log 3 profile, and then exported out as SMPTE 2084
- Provided in DPX, RGB 10 bits
- Different scenes – pan left to right, static confetti, static wide, panning
- Each scene is approximately 14 seconds in duration

Drama content

- The arri alexa camera was used to record the drama content
- The drama UHD SDR used the arri log c
- Provided in DPX, RGB 10 bits
- Approximately 14 seconds in duration
